OBJECTIVE

In programming, an objective can refer to: 1. *Objective-C*: a high-level, object-oriented programming language used for developing macOS and iOS applications. 2. *Objective (goal or target)*: a specific outcome or result that a program is designed to achieve, such as solving a problem, simulating a scenario, or automating a task. In general, programming objectives involve: - Defining a problem or goal - Designing an algorithm or solution - Writing and testing code - Debugging and refining the program -Achieving the desired outcome or result
